APPLICATIONS: METAL CASTING

Break the mold.

Eliminate the limitations of traditional metal casting methods.

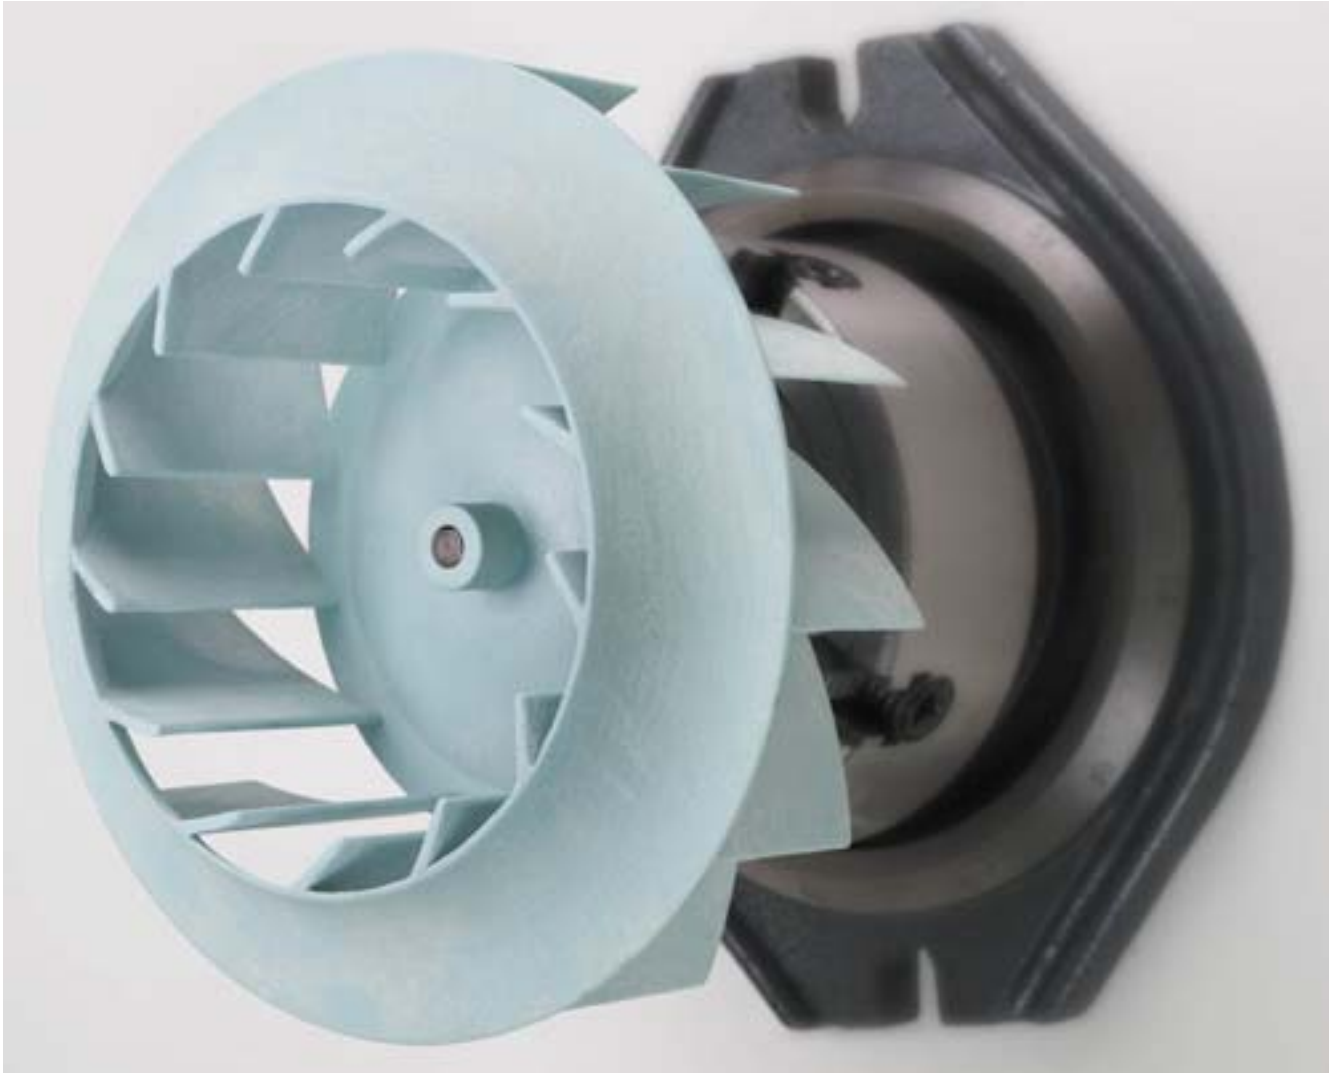

Left: ZCast mold and aluminum pipe created using the ZCast technology. Above: Screen shot of ZCast mold and core set created in 3D CAD.

Ved bruk av Zcast pulver, er det mulig å printe ut former som tåler 1200 grader. Ved å printe ut ferdige støypeformer gir dette mulighet for å lage metalleder hurtig, presist og enkelt !
